

Web开发进阶班第1期

Tutorial 1 Web & HTML

2023.07.20

www.jiangren.com.au

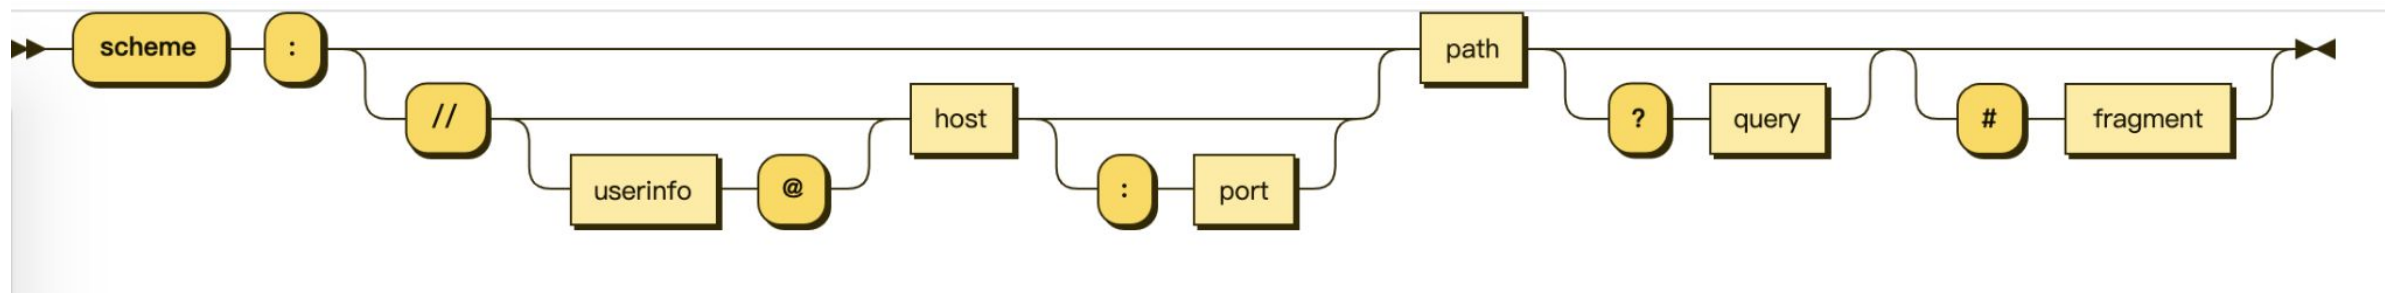

1. Web
2. HTML

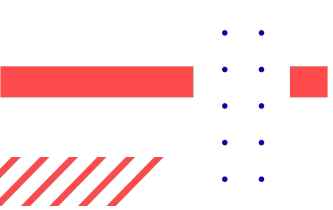

1. Web

URL 结构

<https://learn.jiangren.com.au:443/my-courses?search=web&type=fulltime#detail>

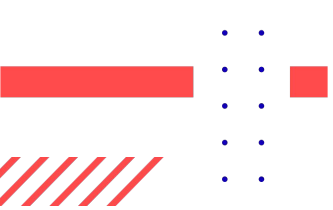

1. Web

Practises

- <https://en.wikipedia.org/wiki/Aviation>
- <https://www.example.com/%D9%86%D8%B9%D9%86%D8%A7%D8%B9/%D8%A8%D9%82%D8%A7%D9%84%D8%A9>
- <https://example.com/%E6%9D%82%E8%B4%A7/%E8%96%84%E8%8D%B7>
- https://www.example.com/index.php?id_sezione=360&sid=3a5ebc944f41daa6f849f730f1
- <https://www.example.com/summer-clothing/filter?color-profile=dark-grey>
- https://www.example.com/results?search_type=search_videos&search_query=tpb&search_sort=relevance&search_category=25#posts

1. Web

RESTful API URL naming convention

In REST, the primary data representation is called resource. Having a consistent and robust REST resource naming strategy. REST APIs use Uniform Resource Identifiers (URIs) to address resources

- Singleton and Collection Resources

- `customers`
- `/customers/{customerId}`

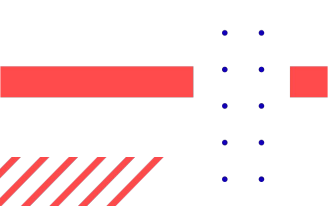

- Collection and Sub-collection Resources

- `/customers/{customerId}/accounts`
- `/customers/{customerId}/accounts/{accountId}`

1. Web

RESTful API URL naming convention

- Use forward slash (/) to indicate hierarchical relationships
- Use hyphens (-) to improve the readability of URIs
- Do not use underscores (_)
- Use lowercase letters in URIs
- Never use CRUD function names in URIs, and no verb in path
- Use query component to filter URI collection
 - HTTP GET `http://api.example.com/device-management/managed-devices` //Get all devices
 - HTTP GET `http://api.example.com/device-management/managed-devices/{id}` //Get device for given Id
 -
 - HTTP POST `http://api.example.com/device-management/managed-devices` //Create new Device
 - HTTP PUT `http://api.example.com/device-management/managed-devices/{id}` //Update device for given Id
 - HTTP DELETE `http://api.example.com/device-management/managed-devices/{id}` //Delete device for given Id
 -
 - `http://api.example.com/device-management/managed-devices?region=USA&brand=XYZ` //Get all devices with region and brand

1. Web

Practises

UMEL -> S2 -> IT (AI)

Schools: JR, UNSW, USYD, UMEL

Semesters: S1, S2, S3

Courses: IT, Accounting

Code: 8000

GET schools/umel/semesters/s2/courses/it/codes/8000

GET All schools/umel/semesters/s2/courses/it/codes

CREATE schools/umel/semesters/s2/courses/it/codes

UPDATE schools/umel/semesters/s2/courses/it/codes/8000

DELETE schools/umel/semesters/s2/courses/it/codes/8000

QUERY Query: AI, Business, Database

All schools/umel/semesters/s2/courses/it/codes?query=ai

2. HTML

- VSCODE
- HTML Preview

2. HTML

- HTML 结构

3. HTML标签和属性

- HTML Elements

Block elements

```
<div> <header> <main>      <nav>   <section>
<footer>  <h1-6>  <p>   <ul>   <ol>   <li>
<table>   <form>   <hr>
```

```
<canvas>  <video>  <output> <pre> <dd>
<dl>  <dt>  <address> <article> <aside>
<blockquote> <figure> <figcaption>
<noscript>  <fieldset>
```

Inline elements

```
<a>  <br>  <button>  <img>  <input>
<label>  <span>  <script>  <select>
<textarea> <b>    <strong>  <em>  <i>
```

```
<abbr> <acronym>  <bdo>  <big> <cite>
<code> <dfn>  <kbd>    <map>  <object>
<q>  <samp> <small>    <sub>  <sup>
<time> <tt>    <var>
```
